

Implementation & Management of Climate-Smart Practices in Forage- Livestock Systems

~Practice, Review, and Q&A session~

Join members of the Extension Livestock Forages team for an informative presentation for farmers enrolled in the Climate-Smart Grown in SC project. This event will include information on common challenges farmers are experiencing while implementing climate-smart practices and conclude with plenty of time for questions.

Farmers may join this meeting online or in-person at one of the participating Cooperative Extension offices. Please register in advance. **Zoom link will be shared upon registration.**

AGENDA:

7:00 PM - Welcome and Overview of:

- Legumes and soil pH
- Choosing the right legume for your operation
- Seeding Rates (pure live seed vs "as sold")
- Planting options: broadcast, drill, frost seeding
- Managing legumes for persistence, nitrogen fixation and reseeding
- Grazing management (target height, stubble height)
- Poultry litter (rate of application, frequency)

8:00 PM - Open Discussion and Q&A

8:30 PM - Adjourn

Tuesday, June 25, 2024

7:00 - 8:30 PM
